Welding Competency Assessment

In-Person Delivery

Hands-on Learning

Program Overview

The Welding Competency Assessment is designed to help skilled newcomers gain recognition for their prior learning and experience. Its “program-in-a-box” model offers a scalable, adaptable solution for evaluating hands-on manufacturing-related skills, ensuring alignment with Canadian standards.

Funding partner to provide wraparound supports including translation and technology support assessments for participants.

Program Structure

WSPS ONLINE COURSE

Learners will be expected to participate in a general safety awareness and expectations course, available in multiple languages, as required.

8 HOURS OF HANDS-ON ASSESSMENT

Learners will participate in an 8-hour hands-on skills assessment to demonstrate the required competencies.
